**THE HISTORY**

**THE FINANCIAL INFORMATION**

## **THE COMPANY**

**OMEGA** contracting is a leading –end –to-end contracting company providing Mechanical, Electrical and Plumbing (MEP), and has provided quality engineering services to the Middle East since its establishment in Egypt back in 1981.

The company's expertise in Mechanical, Electrical and Plumbing (MEP) contracting ranges from providing complete solutions through Design, Engineering & Procurement (DEP) and services across Egypt, all the way to water & power solutions including maintenance and operations.

Omega has successfully completed many prestigious projects in Egypt. Some recently completed projects include **BIBLIOTHECA, EGYPTIAN MUSEUM, & SMART VILLAGE.**

Omega proudly leads an experienced team that efficiently works together to link their strengths and experiences therefore bringing every customer the best in technical services and project management through experienced on-site project teams , the expertise necessary in management , coordination ,planning, purchasing, and quality control. This way we ensure that projects are completed as per client requirements regarding quality, time, and cost.

Omega contracting fully integrated Management Systems, certified to ISO 9001:2000 , ensure full compliance with building , health and safety regulations , as well as sound environmental and energy management procedures

## **THE SUBSIDIARIES**

**OMEGA** contracting Subsidiaries share a common characteristic which is their ability to build and maintain lasting customer relationships. Omega Subsidiaries work together to bring their customers superior service anytime, anywhere.

Omega was originally founded to operate in MEP contracting being engaged mainly in electromechanical contracting.

During 2006, and in accordance with the company's growth strategy to expand vertically and horizontally (organically and inorganically), Omega Export & Import was established.

In December 2009, Omega for Investment was established to cover the field of real estate investment in Egypt and the Arab world.

## **THE HISTORY**

**OMEGA** Contracting was first formed in Egypt in 1981 Operating under the name of Ramico. In 1999 the company developed into Omega Contractors, entering a whole new era.

Our expertise has made us market leaders, providing technical and support services to both the private and public sectors in a number of major niches. We help our clients get the most out of their assets by applying our 30 year experience, diligence, professionalism, and local know-how combined with global knowledge and forward thinking. We optimally use our resource to provide our clients with maximum quality, at the least possible costs.

## **CLIENTS, AWARDS AND MEMBERSHIPS**

We ask the right questions to ensure we understand our customers and then deliver the best solution with our in depth knowledge and expertise in engineering. For this reason many of our customers are major developers and main contractors who demand excellence and they are confident that **OFC** will meet that challenge

## **THE FINANCIAL INFORMATION**

**OMEGA** contracting continues to expand yearly and recently we have gone from strength to strength with diverse business opportunities and a considerable number of secured long term contracts with major leader developers and main contractors that provide a solid platform from which we expand.

Our 30 year experience and the team spirit / enthusiasm that exist in our working environment assure a better future in terms of both record levels and profitability.

- Disciplined procurement
- Strong record in risk management

## **COMPETITIVE ADVANTAGE**

- Omega contracting competes in the 2 tier of electro-mechanical contractors
- Size and leadership in major niches
- Local Know –how with global best Practices
- Strong inclination to partnering ( Public , Private , Peers)
- Forward thinking focused on cost control
- Honorable corporate values
- Initial drawing submittal (showing any modifications on the tender drawing)
- Equipment submittal to show compliance of product to specifications and requirements
- Monthly client reports to keep you informed of the project's progress
- Monthly progress meeting to review, update, and assess project progress so far
- Material Inspection Report- MIR to assure highest quality of materials used
- Material Delivery Report- MDR

## **INTEGRATED MANAGEMENT OF QHSE**

**HEALTH, SAFETY**

**COMMITMENT TO QUALITY**

**QUALITY ASSURANCE POLICY**

## **CORPORATE VALUES**

### **LEADERSHIP**

We embrace and foster leadership in every aspect of our business, from innovation and learning, to management and customer satisfaction, to employee and skills development. An organization's ability to create space to leadership to grow in today's marketplace is perhaps its greatest strategic advantage.

### **QUALITY, HEALTH & SAFETY, &ENVIRONMENT**

We realize that standards of Health & Safety and Environment are integral elements of efficient business management adjectives and contribute to the operational efficiency and overall company profitability. The company is ISO 9001: 2000 certified and our Quality, Health & Safety, and Environment- QHSE management system is highly advanced to guarantee maximum quality at minimum risk and negative impact on the environment.

All divisions and subsidiaries dedicated to supporting and continuously improving the effectiveness of these systems

### **PEOPLE**

We recognize that our people are the foundation of our business. We are dedicated to providing an environment that attracts, motivates, and develops individuals and encourage cooperative efforts at every level and across all activities in the company. We create and implement a succession /career progression planning program that clearly articulates corporate expectations and charts course for employee development

## **Health, Safety, and Environment Policy Documents**

### **Summary:**

These mandatory minimum standards are intended as the minimum basis upon which sites will establish a sustainable safe and healthy environment at work, to maximize performance. This will mean anticipating changes in requirements (being pro-active rather than reactive) and each operating unit and employee taking major responsibility for these areas.

The term employee should be interpreted to include all employees, both permanent and temporary, at all levels.

### **1. Omega Safety policy**

#### **Prevention:**

- 1- Each site must comply with all local safety legislations and with any project owner company standards. Compliance will be with whichever is the stricter of these and it must be documented.
- 2- Each site must have regulatory procedures/ check- ups to ensure compliance with the safety legislations, and must have safety clearance for all materials used to ensure that they are eco friendly.
- 3- Each site must identify those process steps that are critical for the safety of the labor & / or process (Critical control points) and establish a system to control and monitor these.
- 4- Each employee's responsibility for safety must be identified and understood. Appropriate training must be given to prepare employees against potential hazards or accidents.
- 5- Omega must have procedures in place for monitoring site complaints, investigating them and dealing with them promptly, to approach to zero accident loss time (ALT.)
- 6- At Omega we have procedures in place to assess safety incidents, plans to manage any equipment failure, and procedures to report such problems to the project owner according to **Omega** policies for safety, health and the environment.

### **2. Omega Health policy**

#### **Prevention:**

- (1) Each site must have up-to-date written procedures according to health and safety Policy which complies with the local work law. They must be signed by the current senior line person on site.
- (2) Each site must comply with all local health and safety legislations and with any project owner company standards. Compliance will be with whichever is the stricter of these and it must be documented.
- (3) Each site must establish emergency plans for all reasonably foreseeable emergencies and ensure their effectiveness by undertaking regular exercise drills at least bi-monthly.
- (4) All employees must be given appropriate training covering safety induction, and safety awareness training. Such training must be regularly reviewed and updated to ensure efficiency where any adjustments will be immediately communicated to all employees.

#### **Incidents**

- (5) Each site must establish and fully implement an accident/incident reporting and investigation procedure. Each site must collate and keep records of their safety performance as required by their management group to identify common work related injuries and implement any preventive measures necessary.

### **3. Omega Environment policy**

#### **Prevention:**

- 1-** Each site must have an up-to-date written environmental policy, which complies with the local environmental law. It must be signed by the current senior person on site.
- 2-** Each site must comply with all local environmental legislation and with any project owner company standards. Compliance will be with whichever is the stricter of these and it must be documented.
- 3-** Each site must establish emergency plans for all reasonably foreseeable environmental emergencies to avoid any possible harm to the environment.
- 4-** And ensure their effectiveness by undertaking regular exercise drills at least bi-monthly.
- 5-** All employees, including those with specific environmental responsibilities must be given appropriate training, suitable for the execution of their responsibilities. Such training must be regularly reviewed and updated.

### **Personal Protective Equipment's (P.P.E)**

**Omega** will supply site employees the following PPE:

1. Helmet.
2. Safety shoes. (Shock, electricity, oil proof.)
3. Safety belts.
4. Welding faces. (Incase if there is any welding.)
5. Chip glasses. (For protection / during cutting materials. pipe, etc...)
6. Safety gloves.
7. Safety electrical plugs (water proof with cover.)

#### **Notes:**

\* All equipments used (in cutting forming, welding, etc.) are protected by emergency switches & Automatic cut-offs in case of accidents.

## **COMMITMENT TO QUALITY**

Our Quality Management System meets the requirement of international standard ISO 9001: 2000 it encompasses all of the processes involved in the provision of production and services, from initial enquiry through to implementation, operation and reporting

The Products and services we provide are managed in accordance with quality Plans tailored to meet our client's specific requirements and the local regulations. In order to ensure compliance with our Quality Management Systems, regularly quality audits are carried out throughout the organization.

## **Quality Assurance Policy**

Omega applies strict policies when it comes to quality. By enforcing such policies, we are always able to meet agreed contractual specifications defined by the customer, government, and international quality standards.

*Omega* quality procedure will assure sustainable quality of all pipes, equipments, junctions & installments, etc.

This procedure will include:

- (1) Samples representing the lot (5%) will be traced on site every day.
- (2) These tracing samples will be totally identified for trace back of problems by labeling with different codes.
- (3) Any out of specification material will go directly to the rejection area, to be treated as scrap.
- (4) On-line tests will be applied in every stage of the process to ensure compliance with working specifications.
- (5) All type of inspection & methods of doing it will be available in the quality test appendix (submitted later on).

## **VISION & MISSION**

## **VISION & MISSION**

Since the establishment of Omega Contracting in 1980, we have strictly followed our vision for this company which is to maintain and strengthen the quality we provide our customers. Our strategy for sustained quality and growth has earned the trust of all our clients, which eventually got us where we are today. 30 years of experience, major projects, and a solid client base, helped us become pioneers in the contracting business in the Arab Republic of Egypt. We strongly believe that success depends solely on team work and combined efforts and that's why we selectively pick our team members to ensure engineering and construction excellence. We develop ourselves and strengthen our business through providing our customers state of the art project management systems, timely project execution tailored to customer needs, exceptional service with progress reports and updates, transparency and accountability, and of course cost-effectiveness. At Omega, we highly value our employees as they are the foundation of this company. From their experiences, diligence, and high sense of professionalism, there is nowhere to go but forward. At Omega, we are realistic in our goals; we don't over promise, but we over deliver, after all happy customers are our best advertising.

### *Project profile*

#### **Hotel Crowne Holid - Sharm El-Sheikh**

**Client:** Sharm International for Tourism Development

**Location:** Sharm Elsheikh

**Consultant:** Crowne Home

**System Used:** Electromechanical.

Omega Contracting Provided the Complete, mechanical, electrical and Plumbing Services for the Headquarters and Car Parking Building for the Crowne holid – sharm elsheikh

The services provided by omega for contracting included the following:

- Central Air Conditioning & ventilation systems
- Close control air conditioning systems
- Domestic water services
- Drainage
- Fire fighting and detection
- Electrical power distribution
- Lighting
- U.P.S
- Standby power
- Security systems

## *Project profile*

### **Extensions Sonesta Hotel Sharm El-Sheikh**

**Client:** Masters Hotels

**Location:** Sharm Elsheikh

**Consultant:** Dr. Adel Mokhtar

**System Used:** Electromechanical

- Omega Contracting Provided the Complete HVAC, electrical, Services, Security systems For the Extensions Sonesta Hotel Sharm El-Sheikh

Work provided includes Design, Development, and Procurement, supply Installation, testing & Commissioning of Plumbing, fire fighting and Swimming Pool installations.

The services provided by omega for contracting included the following:

- Central Air Conditioning & ventilation systems
- Close control air conditioning systems
- Domestic water services
- Drainage
- Fire fighting and detection
- Electrical power distribution
- Lighting
- U.P.S
- Standby power
- Security systems

## *Project profile*

### **Grand Rotana Spa- Sharm Elsheikh**

**Client** Giza Tourism Development

**Location:** Sharm Elsheikh

**Consultant:** Dr. Galal Mahmoud

**System Used:** Electromechanical.

Omega Contracting Provided the Complete HVAC, electrical, Services For the Extensions Sonesta Hotel Sharm El-Sheikh the works include Design , Development , Procurement , supply Installation , testing & Commissioning of Plumbing , fire fighting and Swimming Pool installations

Grand Rotana Hotel is located on the shores of Shark's Bay and just 1 km from the center of Sharm el-Sheikh International Conference and Golf Resort and away from the Beach Montazah 4 km Naama Bay and about 7 km away from Sharm el-Sheikh International Airport, 8 km.

The date of enterprise of this project is Oct.2005 and Scheduled date of completion is 2007.

Project Scope of work includes for the following

- Central Air Conditioning & ventilation systems
- Close control air conditioning systems
- Domestic water services
- Drainage
- Fire fighting and detection
- Electrical power distribution
- Lighting
- U.P.S
- Standby power
- Security systems

## *Project profile*

### **Kiroseiz tourist resort - Sharm El Sheikh)**

**Client:** Kirosez for Construction and reconstruction

**Location:** Sharm Elsheikh

**Consultant:** Dr. Mahmud Basyony

**System Used:** Electromechanical.

Omega Contracting provided the latest state of the art most advanced technology with full features to its prestigious client state Audi Bureau a solution for an overall project management and system integration of the end to end solution of multi service network with the following: -

#### Building Management System

- A. HVAC System
- B. Fire Alarm System
- C. Elevator System
- D. Lighting Control System and other electro-Mechanical System
- E. Integration of Facility Management System.

## *Project profile*

### **Conrad Hotel- Hurghada**

The Grand Hotel Hurghada, a 5 stars hotel with 232 rooms and suites, some overlooking the sea, is situated in Hurghada at a carefully selected spot, nestled among the majestic harmony of nature

**Client:** Wengez for Hotel & Resort

**Location:** Hurghada

**Consultant:** Conrad Beljika

**System Used:** Electromechanical.

#### **Major Items in Contract**

- 1- HVAC - Mechanical / Plumbing works
- 2- Fire fighting System.
- 3- Close control air conditioning systems
- 4- Domestic water services
- 5- Drainage
- 6- Fire fighting and detection
- 7- Electrical power distribution
- 8- Lighting
- 9- U.P.S
- 10- Standby power / Security systems
